Capabilities of digital neuroscience company

Solution:
NetSuite Services
Resource Planning (SRP)

ORACLE + NETSUITE

About Cambridge Cognition

Cambridge Cognition are a neuroscience digital health company who develop products and services to better understand & treat conditions affecting brain health. Cognitive research technologies accelerate the development of new treatments, improving efficiencies throughout the research process measuring cognitive health and well-being in patients worldwide.

Reasons for choosing Eureka Solutions / NetSuite

Cambridge Cognition chose to partner with Eureka Solutions as they felt that we could provide the level of support required for large scale projects, coupled with our proven ability to produce bespoke products. Eureka Solutions were able to provide their own Warranties Service and Repairs module to help Cambridge Cognition trace Hardware being used in their projects.

Enhanced customer relationships thanks to real-time data visibility

Streamlined financial operations managed entirely from one system

Greater visibility and reporting of issues across the business

Business Challenges

- Data was stored in silos
lack of visibility of key performance metrics
- Limited Reporting Capabilities

Results

- Performance can be measured across the business
- Instant resource utilisation helps justify capital for additional resources
- Decision making has improved across the business

“We chose to work with Eureka Solutions as they clearly understood our business problems. Implementing NetSuite has increased the efficiency of our business, enabling us to strengthen customer relationships”.
