

HOW EUREKA SOLUTIONS HELPED LOGANAIR

Elevate to new heights

Solution:
Sage 200 Upgrade

sage 200

About Loganair

Loganair was founded in 1962 and is Scotland's premier regional airline with a fleet of 27 aircraft featuring 5 different types to meet the challenging weather conditions and airfield environments across 40 routes throughout the UK, Republic of Ireland and Norway. Loganair has previously flown under franchise agreements with both Flybe and British Airways but now operates under its own brand which launched last year.

Reasons for choosing Eureka Solutions

Eureka Solutions have provided ongoing Sage 200 support service to Loganair and recently partnered with them to upgrade to Sage 2016 as their current system was becoming unsupported. Eureka Solutions' Web Purchase Order Addon along with Spindle Document Capture enhance the Sage 2016 Financials for Accounts package and help Loganair to meet business and operational requirements.

Achieved full functionality of the WebPO purchasing Addon

Full interface capability with operational systems

Increase in business efficiency

Business Challenges

- Require a financial system that can accommodate their long-term growth.
- A system that can align with their evolving process design, and help them meet their business requirements add-on.

Results

- Purchase Orders can be raised directly into Sage for approval via Mobile, iPad or PC regardless of location improving business efficiency.
- Able to maintain a historical archive of all financial transactions.

"Loganair are delighted to continue our long-term relationship with Eureka, both for development work and support activities. Our experience at Loganair gives us the belief that Eureka are experts in the Sage product suite, both in terms of the base product and the system Addons which can be invaluable in streamlining our business efficiency".
